Introduction

Welcome to the **Space Launch Frequency Coordination Portal** user manual. This guide will help you understand the navigation, features, and functionalities of the web portal to ensure efficient usage.

Navigating the Portal

Logging In

- Go to <https://slfcp.ntia.gov>.
- Click on Sign in with **Login.gov** to access your dashboard.

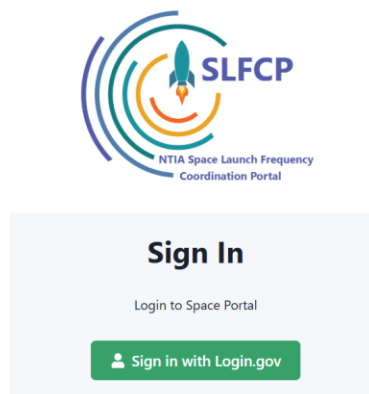

Figure 1: SLFCP Main Login Page

Sign in for the first time

You will be redirected to Login.gov page

TEST SITE - Do not use real personal information (demo purposes only) - TEST SITE

-

Features & Usage

Feature 1: New Request

- Description: This module will be used by commercial entities needing to coordinate frequencies to be used for space launches with NTIA and other federal agencies for their approval of use prior to or as part of their submission to FCC for final approval.
- Steps to Use:
 1. Login to SLFCP portal
 2. Click on “New Request” button in the top right menu.
 3. Fill all the fields being requested and click submit button.
 4. Commercial entity will receive an acknowledgement email and NTIA will receive an email to process the request .

Feature 1.1: New Request Form

- Description: This module will be used by commercial entities needing to enter the new request data that contains different tabs to be able to enter the data. Here’s a brief description of the fields that appear on the new request form.

Note: It is recommended to clear cache/cookies and ‘not’ use/disable auto-populate/auto-complete feature in your browser settings before submitting a new request

Launch Site Tab	
Mission Name	Unique name of the Mission
Name Of Licensee	Name Of Licensee
Call Sign	Call sign of the launch vehicle
Name Of Launch Vehicle	Name of launch vehicle
City	City name
State	State name

Latitude Coordinates	Latitude coordinates
Longitude Coordinates	Longitude coordinates
Launch Date and Time (Primary)	Primary launch date
Launch Date and Time (Backup)	Secondary launch date
Orbital Location	Orbit insertion information
Frequencies Tab	
Number Of Frequencies	Desired number of frequencies requesting as part of this launch request
Create Frequency Section Label	
Frequency Value	Requesting Frequency between 2025-2110 or 2200-2290 or 2360-2395
Location of Transmitter on Launch Vehicle or Platform	Transmitter location on the vehicle
EIRP	Equivalent isotropically radiated power (per individual antenna)
EIRP units toggle button	Units in Watts, dBW, milliWatts or dBm
Transmitted Bandwidth	Bandwidth of Transmitter (in MHz)
Is Signal Filtered?	Indicate if the Bandwidth is filtered or not
-3 dB Bandwidth	RF datapoint option -3 dB
-3 dB Bandwidth Filter	Indicate if -3 dB bandwidth is filtered or not
-20 dB Bandwidth	RF datapoint option -20 dB
-20 dB Bandwidth Filter	Indicate if -20 dB bandwidth is filtered or not

-60 dB Bandwidth	RF datapoint option -60 dB
-60 dB Bandwidth Filter	Indicate if -60 dB bandwidth is filtered or not
Nature of Modulating Signals	Indicates the modulating signal type like FSK or PSK etc
Emission designator	Emission designator containing Bandwidth, Modulation Type, Modulation Nature, Information Type
Transmitter Section Label	
Transmission Start	Transmission start date/time
Transmission End	Transmission end date/time
Antenna Type	Type of antenna (ex: Parabolic, blade, dipole etc.)
Antenna Gain	Antenna gain in decibel with reference to isotropic(dBi) source
Antenna Beamwidth	Beamwidth in degrees at the half power points
Receiver Section Label	(Note: You can enter upto 2 receivers at this time and the second receiver is optional)
Transmission Start	Transmission start date/time
Transmission End	Transmission end date/time
Antenna Type	Type of antenna (ex: Parabolic, blade, dipole etc.)
Antenna Gain	Antenna gain in decibel with reference to isotropic(dBi) source
Antenna Beamwidth	Beamwidth in degrees at the half power points
Direction for Latitude	Toggle button of latitude to indicate North or South
Direction for Longitude	Toggle button of longitude to indicate West or East
Latitude of Receiving Ground Station	Ground station latitude in decimal degrees

Longitude of Receiving Ground Station	Ground station longitude in decimal degrees
Additional Information Tab	
Ground Track From Liftoff Until Payload Separation	Start-End of ground track information
ECF Cartesian Vectors Format (Description)	Brief description of ECF file being uploaded
ECF Cartesian Vectors Format (File Path)	ECF vector file to be uploaded either in .XLS or .XLSX format
2d Ground Track of the Launch Vehicle (Description)	Plot image of the two-dimensional ground track of the launch vehicle
2d Ground Track of the Launch Vehicle (File Path)	2D ground track file image
FCC Filing Date	Date the FCC application was filed (and if pre-coordination, the date pre-coordination was requested). This can be a Past/Present/Future date
Name (Primary POC)	Primary POC in case of questions about the coordination request
Email (Primary POC)	Primary POC email
Phone (Primary POC)	Primary POC contact number
Name (Alternate POC)	Primary POC in case of questions about the coordination request
Email (Alternate POC)	Primary POC email
Phone (Alternate POC)	Primary POC contact number

Feature 1.2: Save Draft

- Description: This module will be used by commercial entities needing to enter the new request data that contains different tabs to be able to enter the data but wish to save the

draft before getting a chance to actually submit it. Data saved will be available for viewing, editing, deleting until it is submitted.

- Steps to Use:
 1. Login to SLFCP portal
 2. Click on “New Request” button in the top right menu.
 3. Fill all the fields being requested and Save Draft.
 4. Commercial entity will have an opportunity to come back to the screen and make changes and/or be able to submit it when ready.

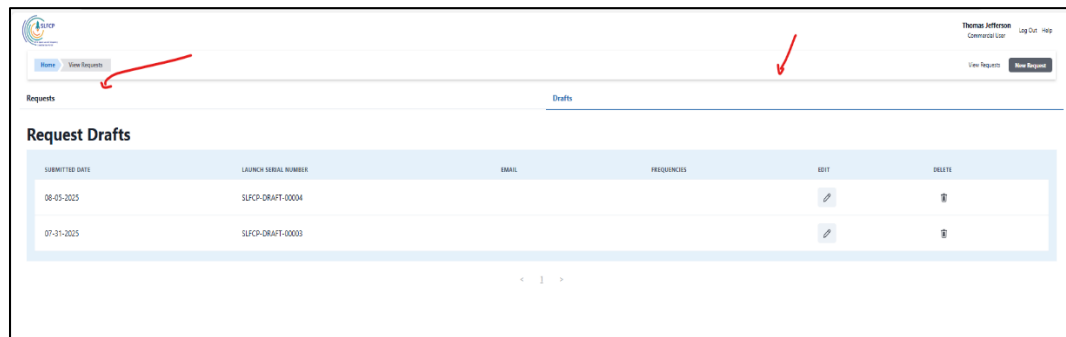

Figure 3: View Requests showing requests and drafts as two different tabs

Feature 2: View Request

- Description: This feature will enable the user to see all the requests submitted or received by the user based on their role as well as the agency they represent while accessing the SLFCP application.
- Steps to Use:
 1. Login to SLFCP portal
 2. Click on View Request menu item in the top right corner

- Based on whether you are an agency user or a commercial entity user, you will be able to view a table/list of all the requests for coordination either received by you as an agency representative or submitted by you as a commercial entity user.

Figure 4: View Requests page showing list of requests

- One of the sub-feature available for every request in the above list would be to “View more detail” which when clicked by the user, they can view a quick summary of the request submitted to NTIA or received and approved/rejected by NTIA.

Feature 3: View Detail

- Description: This feature will enable the user to see the details of the submitted requests irrespective of their role
- Steps to Use:
 - Login to SLFCP portal
 - Click on View Request menu item in the top right corner
 - Click on the ‘eye’ icon to see the details

Feature 4: Revision

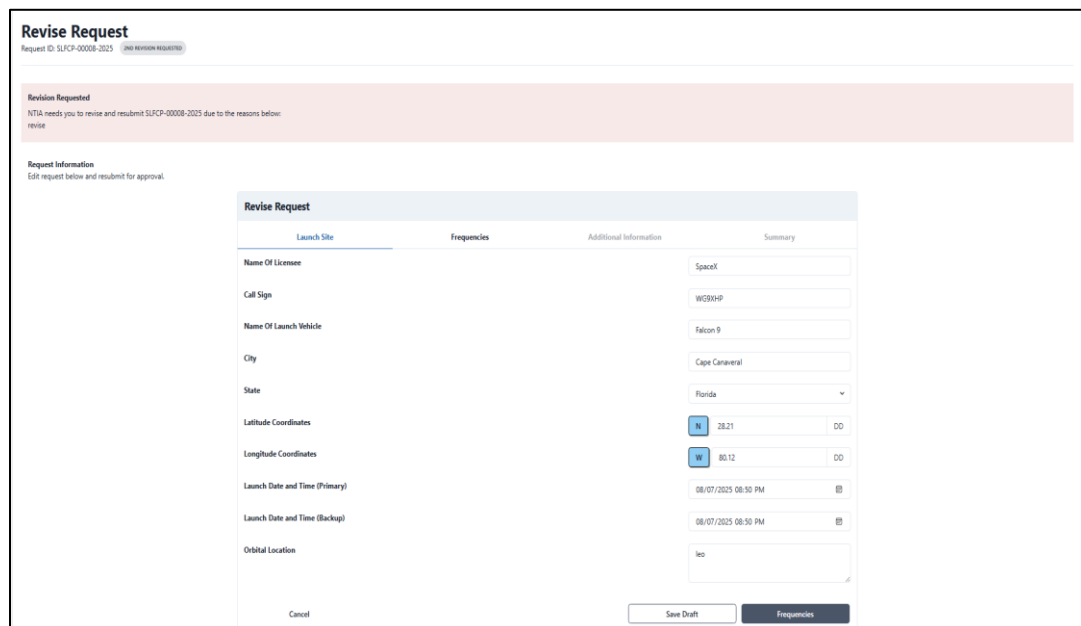

- Description: This feature will enable the user to submit revisions if the request is marked for 'revisions requested' by NTIA either during the initial Review or during the workflow/cycle of the submitted request. Only the commercial entities can submit revisions once a request is marked as 'Revisions Requested' and that will keep the request in the workflow again for further processing.
- Steps to Use:
 1. Login to SLFCP portal as a commercial user
 2. Click on View Request menu item in the top right corner
 3. If a request is marked as 'Revisions Requested' then a pencil icon will appear in the Revisions column of the request row.

Cancel Save Draft Frequencies

Figure 8: Revision request form being edited by commercial entity for resubmission based on NTIA's request

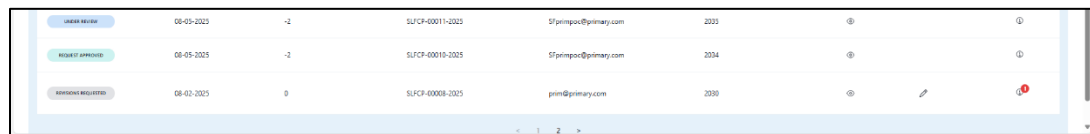

5. The request now is in edit mode (appears exactly as how it would in case of a fresh request). A brief information from the NTIA on top of the page showing the revision comments.

6. Add/modify information on the request based on NTIA's comments.
7. Submit the request and now the request will appear with the status of 'Under Review'
8. NTIA will be notified about the revision request submission for further processing.

Feature 5: Inquiry/Response

Description: This feature will enable commercial entities to communicate with NTIA about their requests and vice versa. Similarly, the federal entities and NTIA can correspond with each other. Such inquiries/responses can be made until a final decision is made on the request after which it will be a read only to see the history.

- Steps to Use:
 1. Login to SLFCP portal as a commercial user
 2. Click on View Request menu item in the top right corner
 3. If an inquiry/response is available for a specific request, then it will have an indicator to alert the user. See Red icon in the below screenshot.

The screenshot shows a table with three rows of request data. The third row has a red circle with a white 'i' icon in the rightmost column, indicating an inquiry or response is available. The table columns include status, date, count, request ID, email, and year.

Figure 9 Inquiry alert on a particular request showing as superscript with the number of inquiry message(s)

4. Users can click on the '(i)' icon to view the inquiry related information and submit a response accordingly. The interaction between the requester and NTIA will be shown as in the screenshot below:

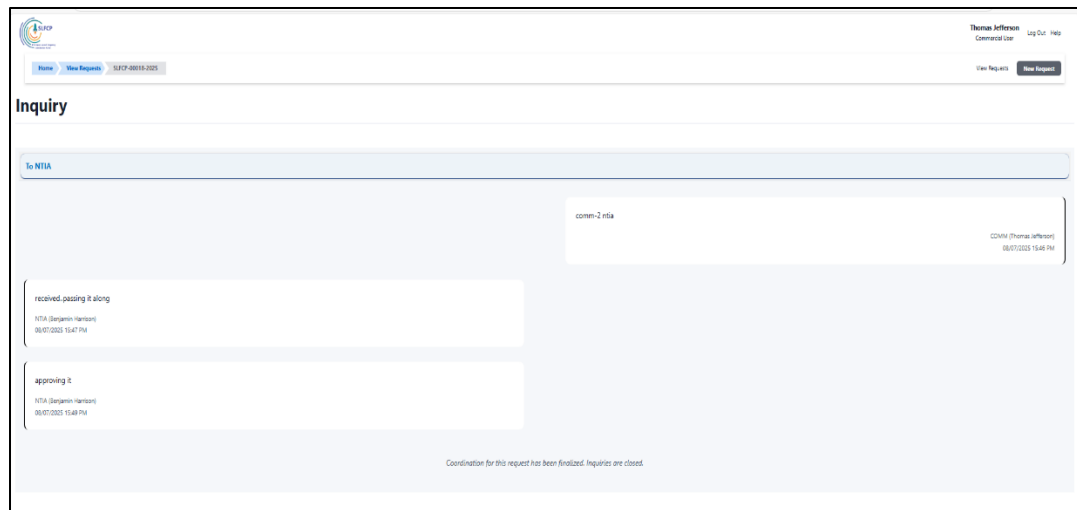

Figure 10: Inquiry exchange on a specific request between NTIA and commercial entity

Troubleshooting & FAQs

Common Issues

Issue 1: User id issues

- Cause: User is not active/not authorized to use the system
- Solution: Contact NTIA helpdesk

Issue 2: Password issues

- Cause: Password either has expired or account locked out or there may be an authentication/Login.gov related issue
- Solution: Contact NTIA helpdesk

Frequently Asked Questions

Q: How to get information on different functionalities available in the SLFCP Portal

A: Refer to the Help file/manual via the Help menu that appears on the top right corner of the landing page

Requests and Submissions:

Q: What information is required when submitting a new frequency coordination request?

A: You'll need to provide:

- Launch date and time window
- Requested frequency bands
- Geographic location or launch site

- Purpose of each frequency use
 - Any relevant coordination documents or attachments
-

Q: Can I submit a single request that covers multiple launch vehicles or sites?

A: No. Each request should be limited to one launch vehicle at one site. If multiple vehicles or sites are involved, submit separate requests for each.

Q: Can I modify a request after submitting it?

A: No. Requests cannot be edited after submission unless there's a revision request. To make changes, please submit a new request and notify NTIA to disregard the earlier one.

Inquiries and Communication:

Q: Who will see my inquiry messages?

A: Only the selected recipient group can view your message. NTIA users, however, have visibility into all inquiries.

Q: How do I respond to a follow-up message from NTIA?

A: Navigate to the original inquiry thread and use the message input box at the bottom to reply. Your message will be appended to the thread.

Q: Will I be notified when there's a new response?

A: Yes, notifications are sent via email to the address associated with your SLFCP account.

Q: How long will the inquiry channel open for editing?

A: Inquiries can be made only during the life of the inquiry, meaning until it's approved/denied and after that no inquiries can be made on that request

Account and Access:

Q: Can I see inquiries from other commercial entities?

A: No. Commercial users can only see their own requests and communications. NTIA users have full visibility.

Q: My agency has multiple users. Will we all see the same request data?

A: Yes, all users from the same agency or organization with proper permissions will have shared access to their group's request history.

Contact & Support

For further assistance, please contact:

- **Support Email:** slfcp-support@ntia.gov
